Nature

Connect with Mother Nature!

Vegetable gardens for organic growers, annual beds for green thumbs, or encompass the yard in beautiful gardens to bring nature to you.

What might your connection to nature look like?

Experience growing your own fresh organic vegetables or just sit back and enjoy a variety of colorful flowers in your garden. If water is more your style, watch as it cascades downstream and over waterfalls before spilling into your pond as the koi dance in and around the plants. Connect with nature in your own backyard.

Pro tips for any landscape design:

Pro Tip #1

Find the right company: Do your research, ask questions, and compare companies.

Pro Tip #2

Often firms excel at design and others at installation and some at both! However, not all firms are a good fit for all budgets and work scopes. Find a firm that works best *for* you and *with* you.

Pro Tip #3

Most project cost is directly from labor which can consist of 70-80% of the total cost. The more complex and custom the feature, the more expensive it will be.

Pro Tip #5

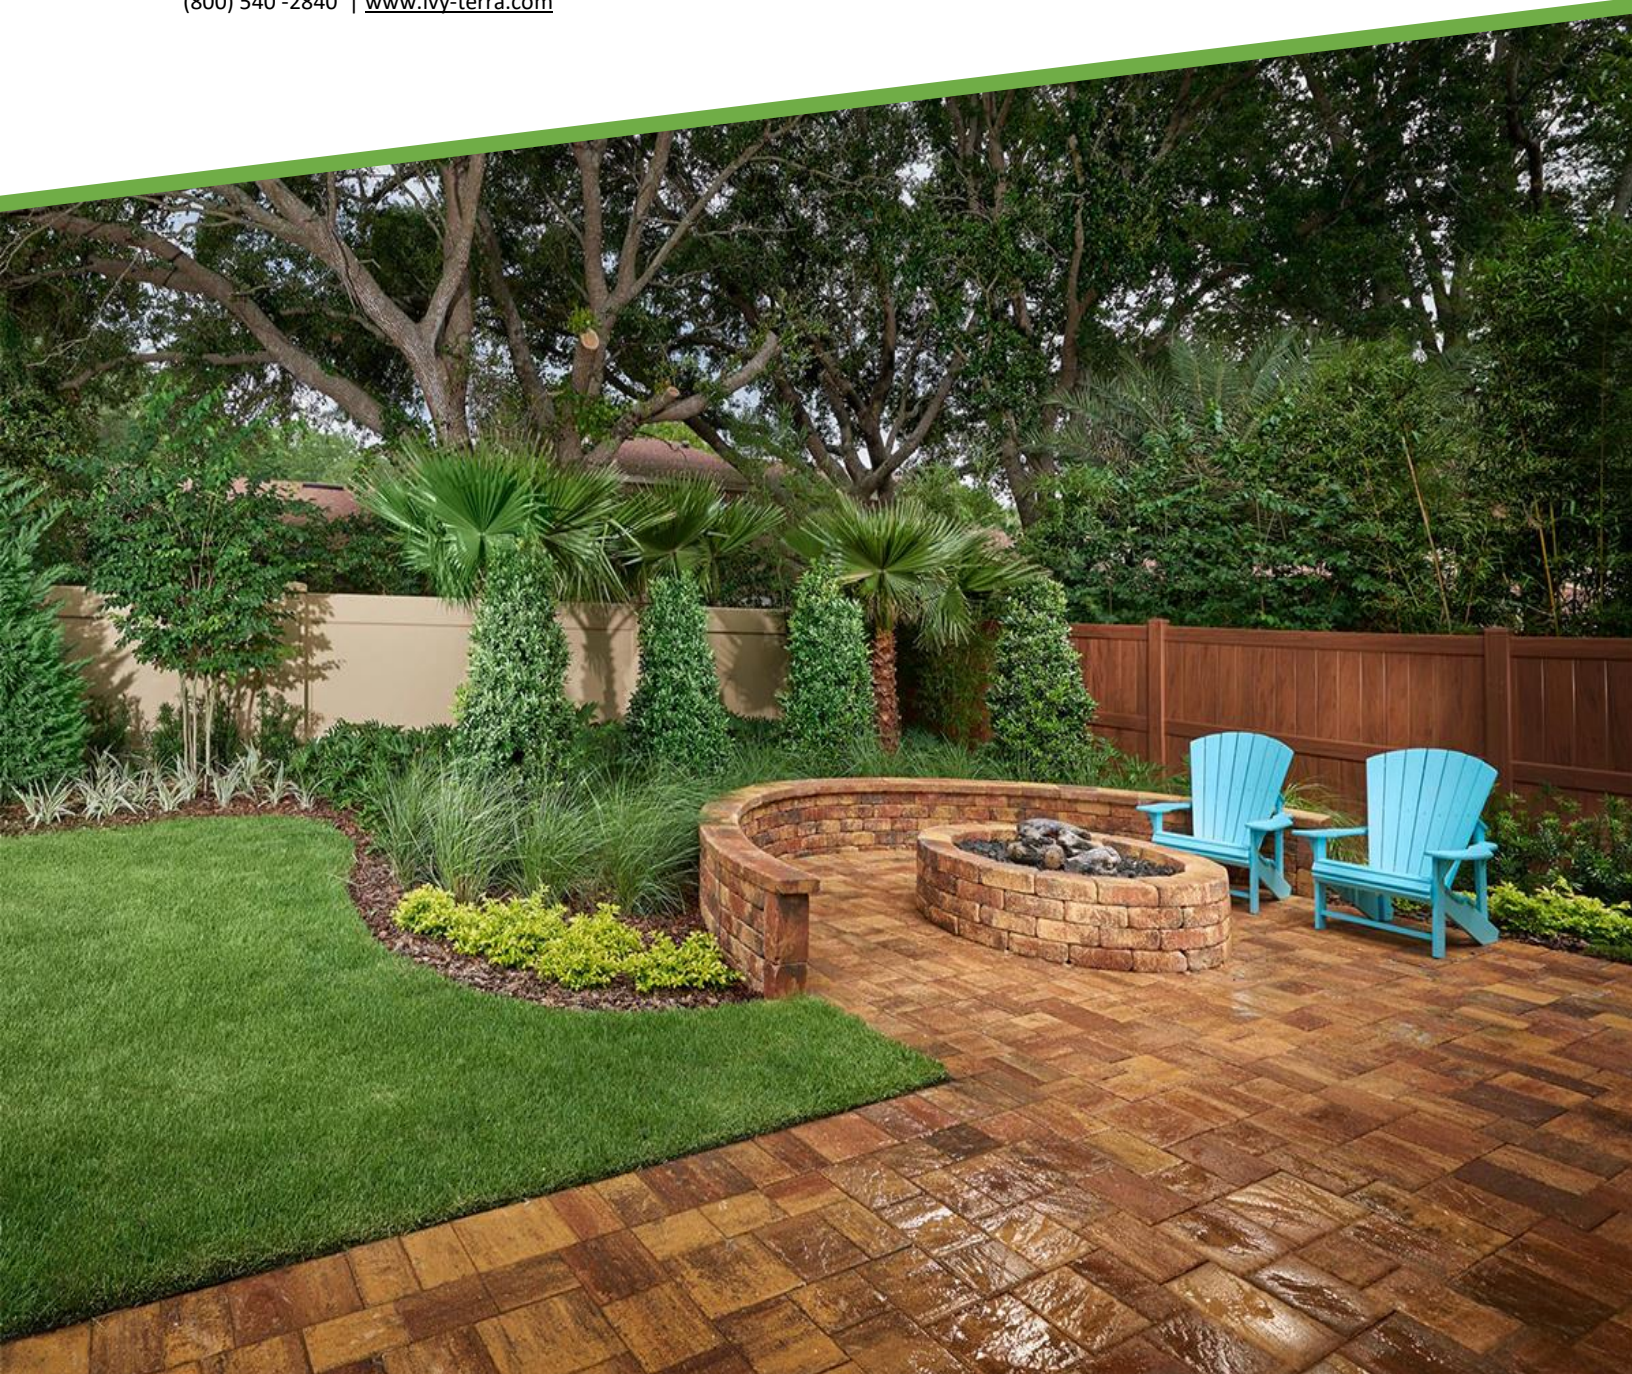

Check-in with the construction supervisor daily or every other day. You want to make sure that the work is coming out as intended and any deficiencies or issues are addressed immediately.

Finally, live the outdoor lifestyle and enjoy it, you have earned it!
